

Electricity North West

Email from ENW:

Electricity North West has a scheme to renew the existing services to the terraced properties (No.11 to 15) at The Square, Parton. The pole where the overhead services are currently fed from is rotten and needs to be replaced. We have therefore put together a scheme to underground these services, and remove the pole and overhead line completely. The majority of this work falls within land owned by the Parish Council.

In order to underground these services, it will be necessary to install an underground cable along the approximate route shown dashed orange on the attached explanatory plan. It will also be necessary to recover the overhead line and pole shown green.

I confirm that all excavation and reinstatement work will be undertaken by Electricity North West/Electricity North West's appointed contractors to your reasonable satisfaction, and that the Parish Council will be fully indemnified against any loss or damage arising as a direct result of these works.

Before proceeding with works of this nature on private land, I am required to obtain the Council's consent. Accordingly if you are in agreement to the works proceeding as I have described above, may I suggest that the matter be recorded by way of Electricity North West's standard Wayleave Agreement a copy of which is attached for signature. I would be grateful if you could print two A4 colour copies of the agreement before having both signed and returned to me at the below address. Alternatively, if you would like hard copies in the post please let me know.

Please note, I have also included the proposed underground cable along 'School Terrace' on the wayleave plan. If this land is not owned by the Parish Council, please let me know and I will take this off.
